RELEVANT EXPERIENCE

MES Application- Front-End and Back End Development [Deployed](#) [Github](#)

This is an application designed for small businesses to keep track of their manufacturing process. This will help store inventory, orders, product recipes, as well as how far along the in the manufacturing process an active order is. The value in this application is the automatic processes that happen between the different pages such as upon order completion the inventory is updated.

Grade Book App- Back-End Development [Deployed](#) [Github](#)

This app provides a simple streamlined user experience for teachers who need a place to input their students grade and assignment data and add new assignments and then grade them.

Sacramento Crave-Back-End Lead [Deployed](#) [Github](#)

This site will provide indecisive Sac locals the option to dine in with a recipe of their choosing or dine out at a restaurant for a night on the town. Once you log in to the site you can choose which experience you are interested in. With the recipe page search by keyword and prep time. With the restaurant page search for a cuisine type or name of an establishment.
